

Media Server Installation (For Media Server Edition only)

With the build-in Media Server capability, the YES Box N2100 provides media streaming service to stand-alone networked home media adapters that support the UPnP AV protocol or are Digital Living Network Alliance (DLNA) standard compliant. Please install the Media Server on to your YES Box N2100.

Steps to Install Media Server

1. Please login as administrator, and go to firmware upgrade page by click on **System > Firmware Upgrade** menu item.
2. Click on the Browse button to browse your companion CD, and select the media server software, **Media_Server_N2100_v10.bin**. The path is [CD_ROM_DRIVE]:\application\Media_Server_N2100_v10.bin

3. Click on **Apply** button to start the Media Server installation.
4. After the Media Server is installed, the YES Box will reboot. After the YES Box is rebooted, the Media Server is ready for use.
