

N1200 RouStor at home

N1200 with RouStor Technology is designed for home users. Users can connect their network devices, such as music players, digital media adapters, IP cameras, even PC, directly to the onboard switch of N1200. RouStor is designed to be space saving and cost saving. Accessing your contents stored in N1200 will never be easier and more efficient.

For more information on how to setup digital media adapter to work, please see [MediaServer Connection](#).
