

## How to share your CD or DVD contents using Thecus YES Box N2100 painlessly?

Published: March 24, 2008

### Scenario:

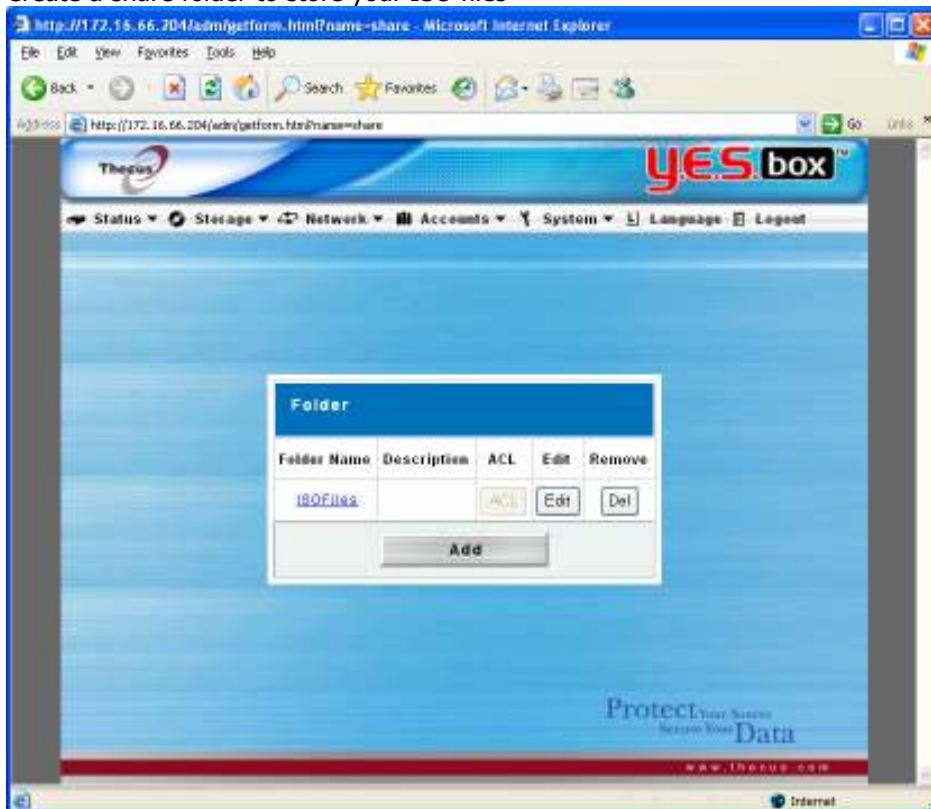

When there are lots of CDs or DVDs need to be shared between different users, it is always a hassle to find the one from a stack of CDs or DVDs. ISO Mount is designed to ease the pain of CD/DVD content sharing.

### Equipments:

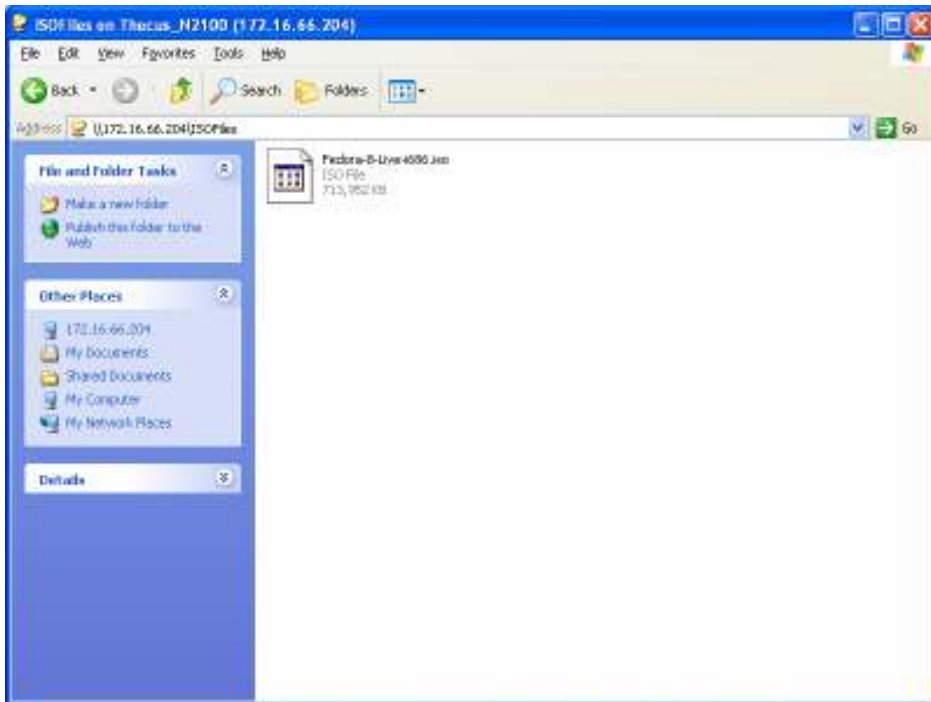

- Thecus YES Box N2100 (Firmware version: 2.01.09)
- PC

### Procedures:

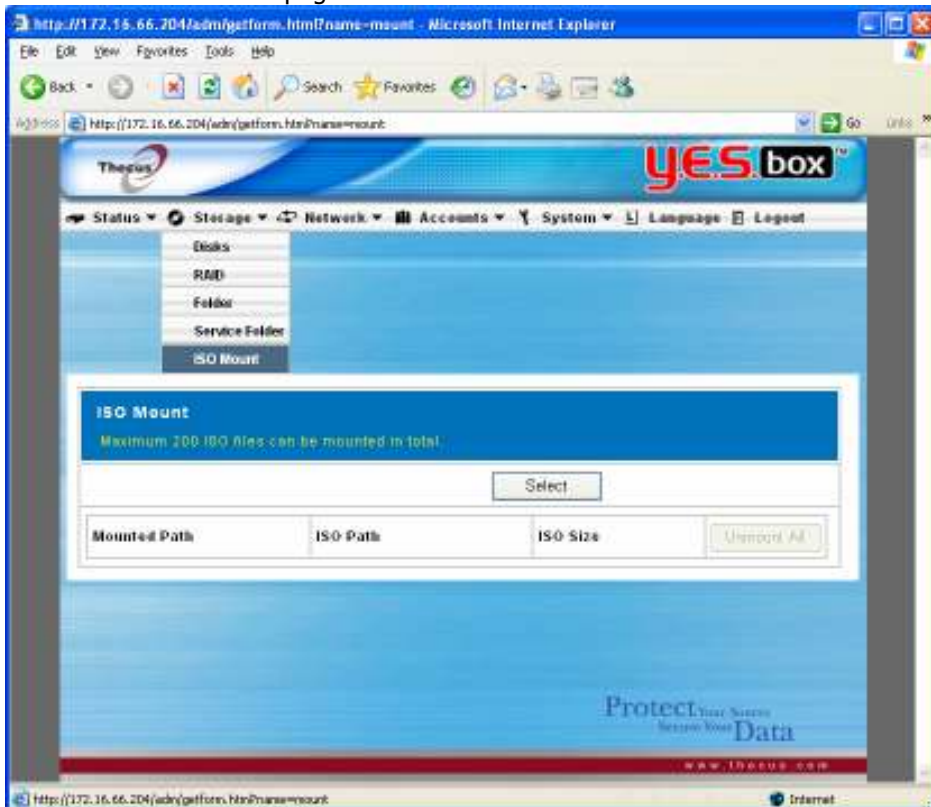

1. Create a share folder to store your ISO files

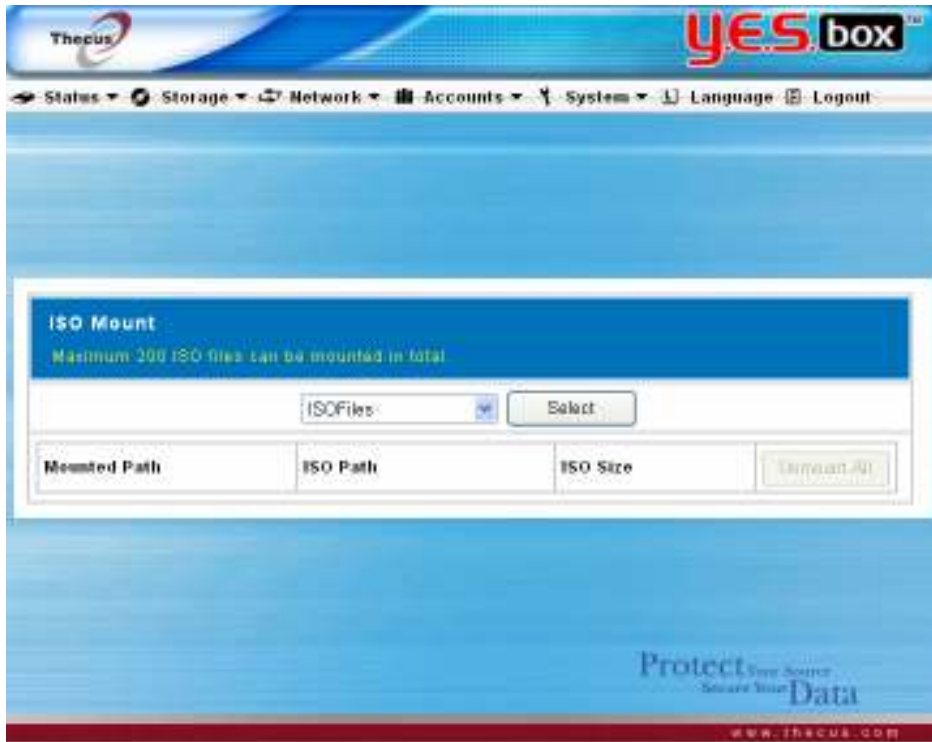

2. Transfer your the ISO image of your CD or DVD to the share folder

3. Go to ISO Mount admin page

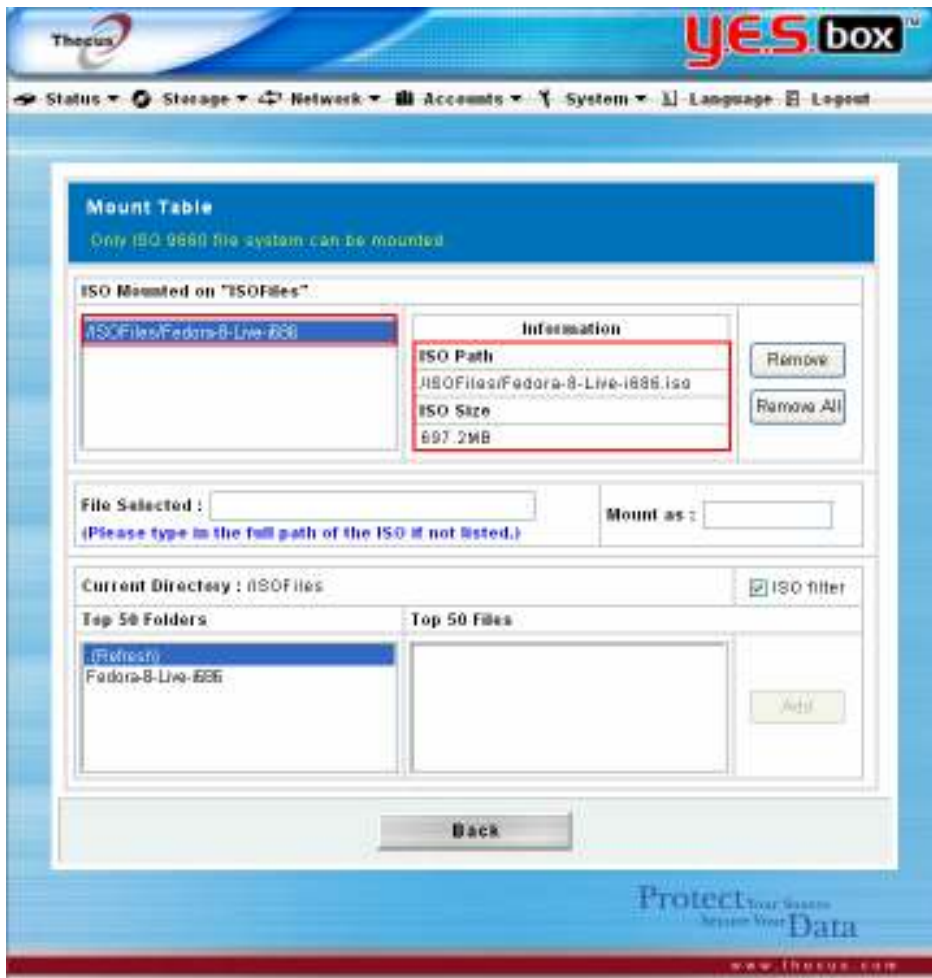

4. Select the share folder which contains to ISO files

5. Select the ISO image you would like to share over the network and click on Add button

- Selected ISO file and its information will appear in the "ISO Mount" list

7. ISO file is successfully mounted, and content is shared on the network.
